Objective

I am an experienced Full Stack Software Engineer Frontend focused with three years of expertise in building responsive web and mobile applications. Skilled in enhancing user experience, optimizing performance, and delivering impactful solutions that drive business growth.

Experience

- **Rigt**   April 2023 - Present
Senior Frontend Developer
1. Preparing Rigt UI library ready for production use and that did a great impact to build the features of Rigt Enterprise applications faster.
2. Developing complex components for Rigt UI library, which had a substantial business impact across various projects.
3. Fixing performance issues of Arbela Customer Store which enabled initial load faster and smoother.
4. Designed scalable frontend architecture for cardHouzz's new Merchant Portal and Arbela Seller Portal, allowing both projects to reach production within 3–4 months, thanks to excellent teamwork and dedication.
5. Mentoring junior developers and contributing to team knowledge sharing
6. Implementing Unit Testing and End to End Testing using Vitest and Cypress

- **Datacode**   June 2022 - April 2023
Software Engineer
1. Successfully worked remotely for one year, demonstrating excellent communication and time management skills.
2. Improved the design and responsiveness of Al-Bustan E-commerce for both mobile and web platforms, enhancing user experience and accessibility.
3. Rebuilt the Zubena mobile application with a fresh design and new features, significantly improving user experience and contributing to increased business revenue.
4. Enhanced the functionality and performance of the Batumi View app through direct client collaboration, ensuring alignment with their vision and requirements.
5. Designed and developed a complete clothes e-commerce mobile application, transforming the project from Figma design to a fully functional product, delivering a seamless user experience.

Education

- **Koya University**   October 2018 - May 2022
Bachelor of Software Engineering
Medium

Skills

- Git / GitHub
